*Irrigators Inc. has done all our irrigation pump work since 1974. A few years ago Irrigators installed two Variable Speed Drives which control eight separate pumps. We are enjoying the benefits of convenience, efficiency and energy savings on our irrigation systems. Thank You Irrigators Inc. Keep up the good work.*

*Wes Boorman*

Providing Variable Speed Drives since 1975

## VFD'S SAVE

MONEY • TIME • POWER

Pump slows down automatically when demand for water is reduced and saves money.

If the flow is reduced by 10% the power use is reduced by almost 20%

Control multiple pumps from one location

No pressure spike

Demand charges are reduced

Reduce power usage

Control pressure automatically

Three Phase power can be created from single phase power with a VFD
