*We* were Irrigators Inc.'s first customer in 1973. We have moved into the second generation of T&R Farms as a customer. That has to say a lot about their ability to deliver. When we really needed them they have always been there for all our irrigation needs. Irrigators inc. designed the system 40 years ago for row crop but it now handles orchard as well. The initial design allowed us to expand our acreage to over 5000 acres with only minor changes. A job well done by Irrigators!
